We LM GLASFIBER Poland Ltd confirm that the company of NIRAS Polska Ltd with the official seat in City of Cracow performed the full design and project management service during the construction of phase 1 of LM GLASFIBER Goleniów wind blades production plant.

Our plant located on the plot of 27,8 ha area consists of: BWS 1 production building – area of 12 841 m², administration building – area of 569 m², warehouse building – area of 1717 m², pump station building and water tanks – area of 334 m².

The following scope of NIRAS works done in: 2007 - 2009 was included:

- a) feasibility studies
- b) basic designs to obtain construction permits: architecture, structure, installations: sanitary drainage, HVAC, electrical, low voltage, fire sprinklers
- c) tender preparation for General Contractor selection
- d) project management
- e) hand over procedure and formalities to obtain exploitation permit
- f) tests of oversized transport possibilities via neighboring interchanges
- g) design preparation for interchanges reconstruction considering oversized transport, obtaining of proper approvals and permits, interchanges reconstruction supervision

During many years of NIRAS service related to this project, NIRAS proved proper technical solutions adapted to our needs and budget possibilities, also NIRAS tested positively as construction supervisor what made possible to start our production activities according to our schedule.

Based on the result of our cooperation LM GLASFIBER can recommend NIRAS Polska Ltd. as credible and solid partner in investment preparation and management.
